Certificate of Continuous Professional Development in Sexual Health Advising Skills

Sexual Health Advising – Widening the remit

**30 Credits at either
Level Five, Level Six or Masters Level**

HEN 62062-5 or HEN 63074-6 or SHM 58144-7

Introduction

This award will develop the student's knowledge and understanding of the theory and practice of sexual health advising through a programme of self directed study. The award can also be taken as part of the Specialist Practice Award in Public Health (Health Advising) an NMC registrable qualification. (pending validation). The award is predominately delivered by distance learning, with the development of skills being incorporated into 4 study days.

The indicative content will examine:

Issues associated with sexual health advising practice including an epidemiological overview of sexually acquired infections including HIV, the diagnosis and management of sexually acquired infections and HIV.

A historical background of the public health role of the sexual health advisor, incorporating the models and practice of partner notification and health promoting practice, including both community and hospital based practice. Examination of current and future development of the sexual health advisors role, Legal and professional framework of sexual health advising; including historical development and examination of current legislation, professional and ethical guidelines affecting practice.

Communication models, development of skills and practice of such skills, with the individual presenting to a sexual health advisor. Exploration of specific cultural and gender issues. Examination of personal values and judgements and impact upon practice will also be explored.

The Award will give the student either 30 credits at Level Two, 30 credits at Level Three, or 30 credits at M Level. The level studied will be dependent on students individual needs. The student will need to state which Level they require on the enrolment form.

Entrance Requirements

Working in an area where the provision of sexual health is part of the professional role.

Assessment
